

PEER

Motivation(s)

- Build an open registry for SAML metadata
- Build re-usable software for said registry
 - <https://spaces.internet2.edu/display/PEER/>

Project Organization

- ISOC funds
- TERENA organizes
- YACO.es implements
- WAYF, SWAMID, I2, ISOC and the community at large provides governance and feedback

Status

- Demo from Lorenzo next
- 85-95% of the required features done
- Second round of development gets us to 110%
 - Additional requirements from SW reuse goal
 - Potential for some additional funding to do things like PIV/CAC-authn and other stuff not directly related to *public* PEER
